

Your First Choice for Floating Dock Solutions

For Immediate Release

September 10, 2014

[AccuDock](#)® Completes their ISO 9001:2008 Certification

AccuDock® is proud to announce that, as of September 3, 2014, the arduous process of attaining their ISO 9001:2008 certification has been completed. ISO 9001 is published by the International Organization for Standardization in Geneva, Switzerland and is the internationally recognized standard that is the basis for review and certification of a company's quality management system.

Over the past year, AccuDock®, has had an internal manufacturing specialist with extensive experience in ISO Certification and Standards, lead the pursuit of becoming ISO 9001:2008 certified. AccuDock's internal manufacturing specialist worked diligently alongside Core Solution, one of the largest and most respected ISO registrars in the world, in refining all processes related to continually improving the quality and consistency of their [floating docks](#), customer satisfaction, and on-time delivery.

Each AccuDock® employee was involved in becoming ISO 9001 certified and were individually tasked with ensuring that specific quality management procedures, pertinent to their unique job tasks were in place, implemented, and perfected. Involvement at every level of the company is a key factor in making sure that every aspect of manufacturing AccuDock® [floating platforms](#) and operating procedure is compliant with ISO 9000 quality standards. In order to maintain their ISO Certification, AccuDock® must also participate in regular annual audits conducted by the assigned external registrar (NQA-USA).

[AccuDock](#)® CEO, John Harrison, states in relation to AccuDock® becoming ISO 9001 certified "I am excited to know that each AccuDock® employee is empowered with the knowledge of how to address any possible inconsistencies in the most efficient and effective manner possible. In turn, productivity, quality, employee and customer satisfaction will all be increased." The main focus of becoming ISO 9001 certified, is the end user; and AccuDock® has made every effort to ensure that each aspect of overall operating and manufacturing procedure continues to be in line with keeping the end user's satisfaction as the top priority!
