July 2013

Event: ACCUDOCK™ Installs AccuDeck™ Rowing Dock

Devon Boathouse, Oklahoma City, OK

AccuDock™ has completed the installation of their customized low profile rowing docks specifically for Devon Boathouse on the Oklahoma River. This unique low profile rowing dock was designed using the new AccuDeck™ composite decking; a great addition to the already distinctive and pleasing aesthetic of the Boathouse.

To view more photos of the new Devon Boathouse rowing dock, visit AccuDock.com

AccuDock™ has released the new AccuDeck™ option in 2013. The AccuDeck™ allows for a low profile fully decked floating dock. AccuDock™ is able to supply a finished decked dock using their standard float sections, and the same connection method. AccuDock's unique design allows them to utilize any type of decking desired by the customer and multiple colors and styles are available. The AccuDeck™ system also can be applied to a customer's existing dock setup, as well as all new AccuDock™ applications. Contact AccuDock™ for assistance in your design and getting started in improving your waterfront property.

For additional information or a sample copy, Contact: Christine Catalano /Marketing Dept via email christine@accudock.com

Based in Pompano Beach, Florida, Accudock has been providing customers with floating dock solutions since the mid 1990's. Starting with commercial floating platforms, and have integrated into the residential and club applications. Rowing docks, kayak docks, commercial platforms, work floats, and aluminum gangways are some of what they now offer. What separates AccuDock™ from the competition is their ability and willingness to customize products that fit the customer's exact needs.
