

AccuDock® (JMH Marine, Inc.) Awarded GSA Contract /Schedule 84

January 20, 2014 - Press Release

Pompano Beach, FL – AccuDock® (JMH Marine, Inc.) announced the recent award of GSA contract # GS07F1078A on Schedule 84 for the company's USA made quality floating dock products. AccuDock's listing on the GSA Schedule provides government customers with the ability to conveniently purchase and install floating dock applications for ADA, Commercial and public access Park's paddle sport recreation sites. AccuDock® plans to list its full product line of dock applications on GSA Advantage® for ease of direct purchase. Additionally, AccuDock® plans to extend their GSA savings to all government agencies that are able to qualify for direct purchase through GSA procurement procedures.

Schedule 84 includes Total Solutions for Law Enforcement, Security, Facilities Management, Fire, Rescue, Marine Craft and Emergency/Disaster Response also known as SIN 260-12 (Floating Marine Barriers and Booms, Floats, Perimeter Floats, and Moorings). The schedule includes all components needed for a complete floating dock application, connection hardware, complete paddle sport dock packages as well as commercial applications (scaffold work platforms/commercial boat launch systems). Orders are being processed immediately for the upcoming season, under GSA terms, while AccuDock's team continues to add the product list to the GSA Advantage Catalog.

AccuDock® has the ability to design applications to meet ADA Compliant requirements as well as OSHA, quality and environmentally friendly standards.

They dedicate the necessary time and effort in finding the best solution for any size project or special custom design needs. The AccuDock® GSA team utilizes years of experience in working closely with government procurement processes and put every effort towards each individual project from the preliminary design to the final installation of your project.

If your project requires meeting specific funding requirements, AccuDock® has the ability to create a complete floating dock application to meet your project and budgetary obligations.

AccuDock® is a trusted supplier of quality floating dock applications to such agencies as; National Park Services, US Coast Guard, US Navy, Department Of Interior, Fish and Wildlife Service, Department Of Defense, Nuclear Power Plants, Discounting also extended to (GSA approved) State, Local & Municipal agencies

"AccuDock has experienced an amazing growth in the federal project market with release of our ADA compliant applications as well as our continued supply of our floating scaffold platforms for the USCG", John Harrison, President/ Owner of JMH Marine, Inc. (AccuDock®), "As we continue to facilitate a number of RFQ's for our many floating dock applications; we found it only appropriate that the next step for AccuDock's future growth was to pursue our GSA Schedule Contract to allow these agencies the ease of direct purchase via GSA Advantage".

About AccuDock® (JMH Marine, Inc.)

Based in Pompano Beach, Florida, AccuDock® has been providing customers with floating dock solutions since 1993. Originally servicing the commercial market with floating work platforms, AccuDock® quickly grew and continues to release new and innovative products to their line applicable for any market requiring access on the water.

What separates AccuDock® from other floating dock companies is having the commitment and willingness to customize products that fit the customer's exact needs. AccuDock® fabricates the floating dock sections in any size, shape, or height (profile). AccuDock® offers products for government agencies, residential waterfront projects, rowing club & university applications, paddle sport floating docks, commercial scaffold floating platforms, work floats and aluminum gangways.
